Dealing with signs of illness and colds
in children in day care and primary schools, 06.09.2021

When must a child stay at home?
A child should be kept at home if symptoms occur repeatedly or persistently that have a sickness value and indicate a communicable disease. A medical certificate is not required for attendance at day care or school. If a medical certificate is presented that supports a visit to day care or school, the child may attend day care or school.

<table>
<thead>
<tr>
<th>Simple cold without additional signs of illness</th>
<th>Increased temperature / fever (more than 37.5°C)</th>
<th>Cough / Sore throat</th>
<th>Loss of sense of smell / sense of taste</th>
<th>Headache</th>
<th>Gastrointestinal complaints</th>
</tr>
</thead>
</table>

At least one of the above-mentioned symptoms must be acute.
In case of known chronic diseases with similar symptoms, a medical certificate is recommended.
